

Job Description

Job Title: Civils Site Supervisor
Company: Network Plus
Location: Bradford
Salary: Varies depending on experience

About the Business:

Network Plus is a leading utility and infrastructure service provider. Every day, we safely maintain, construct and deliver essential services to millions of customers across the UK. Since starting the Company in 2000, Network Plus has grown considerably and now employ over 2000 people across the country.

Job Purpose

Based at our Office in Bradford, you will be responsible for Supervising and managing the civils teams working as part of the new City Fibre contract. Working to meet the needs of the client in the most cost-effective manner, whilst working with your team and making a profit for Network Plus. You will provide technical expertise, experience and work within a team to deliver a first-class service to our customers.

The Supervisor will be competent on working in Telecoms Networks and have experience of working on City Fibre installations.

Be able to engineer solutions on site and focus your teams on completing work right first time.

Working with the scheduling team ensuring programmes are managed and delivered accordingly providing support to ensure that the company's work is effectively completed through communication with internal and external customers as well as the management of the business and client database systems.

Overview

City Fibre designs, operates and owns an independent, full fibre communications infrastructure across the UK and is the UK's largest alternative provider of wholesale fibre network infrastructure.

City Fibre plays a key role in the communities it serves, providing an essential service to allow homes and businesses to connect and communicate at high speeds.

City Fibre has a significant investment programme underway to develop a gigabit-capable full fibre network that will allow it to connect eight million homes and businesses across the UK by 2025.

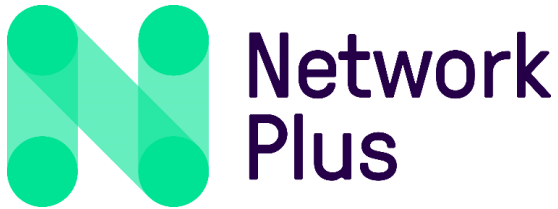

The Bradford works cover the construction of the FTTP network for approximately 137,300 premises and associated feeder network construction.
