Frontend Developer
Salford

Our Company

Network Plus is a leading utility and infrastructure service provider, operating across the UK.

Originally established in 2000, the company has grown significantly through the award of long-term contract frameworks with major utility organisations and infrastructure providers. With a current workforce of over 2,000, our services are delivered through an absolute focus on health and safety as well as market leading levels of service to both our clients and their customers.

Our Headquarters are based in Salford, near Manchester, and we operate from over 20 regional depot bases. We deliver services 24/7/365 in city centres as well as rural locations.

Our vision is to be the best service provider in the UK utilities and infrastructure sectors by safely constructing, maintaining and managing essential services at the lowest sustainable cost.

Our role

As a Frontend Developer you will provide new software development; along with adding new functionality and ongoing maintenance. You will also be tasked with helping to develop and maintain a new software system, which is to be used nationwide. This role requires front end knowledge and a good understanding of modern software architectures and development techniques. This role offers a great opportunity to advance the product and customer journey at an exciting time of growth and change.

Key responsibilities

You will be responsible for ensuring the technical solution that is delivered to the end user(s) meets their expectations and is the right technical solution

You will own the high-level solution and design decisions for a project or product, identifying the environmental factors, components, intercommunications, data requirements and standards required to successfully deliver the solution

You will produce design (UML) and specification documents and ensure that they are agreed with the end user(s), Project Manager and Business Analysts. You will then communicate these to development team

You will own the overall solution, from conception to delivery, you will monitor the project and ensure, at a high level, it is being developed as required with regular communication with the squad

You will have a high-level interest in emerging technology, techniques and industry trends and innovation to ensure they are able to adopt the most appropriate tools and technologies for the project or product

You will have an appetite for best practice development, re-use and sharing of functionality, improving development techniques and a commitment to learning new, emerging technologies

Experience and Qualifications

Production experience in Angular 6+ (required)

Experience of HTML5 web apps (required)

Use of third-party UI libraries i.e. DevExtreme, Material etc (ideal)

Experience in .NET Core 3+ (ideal)
