

Site Supervisor - Fibre Isle of Wight

Our Company

Network Plus is a leading utility and infrastructure service provider, operating across the UK.

Originally established in 2000, the company has grown significantly through the award of long-term contract frameworks with major utility organisations and infrastructure providers. With a current workforce of over 2,000, our services are delivered through an absolute focus on health and safety as well as market leading levels of service to both our clients and their customers.

Our Headquarters are based in Salford, near Manchester, and we operate from over 20 regional depot bases. We deliver services 24/7/365 in city centres as well as rural locations.

Our vision is to be the best service provider in the UK utilities and infrastructure sectors by safely constructing, maintaining and managing essential services at the lowest sustainable cost.

Our role

As a Site Supervisor you will be responsible for supervising and managing the civils teams working as part of the new Wight Fibre contract. Working to meet the needs of the client in the most cost-effective manner, whilst working with your team and making a profit for Network Plus. You will provide technical expertise, experience and work within a team to deliver a first-class service to our customers.

As a Supervisor will be competent on working in Telecoms Networks. You will be able to engineer solutions on site and focus your teams on completing work right first time.

You will work with the scheduling and civils team ensuring programmes are managed and delivered accordingly. You will provide support to ensure that the company's work is effectively completed through communication with internal and external customers, as well as the management of the business and client database systems.

Key responsibilities

You will take ownership of each workstream, coordinating the work from receipt, through to job completion

You will understand and supervise all Surveying/Pre-siting activities, all route proving – rod-ding & roping activities, all blockage and stoppage clearance sub-ducting and cable pulling activities, blown fibre, splicing, testing and commissioning alongside pole erection and aerial activities

You will be able to produce As-Built drawings

You will ensure that all the client and operational requirements are met in a professional and efficient manner

You will provide daily and weekly reports as required and to ensure that all service levels and objectives are achieved

You will provide a positive and innovative input into the team, through provision of solutions to problems and embracing change

You will ensure that safety issues are reported in line with Company procedures
