

Software Tester - Automation Salford

Our Company

Network Plus is a leading utility and infrastructure service provider, operating across the UK.

Originally established in 2000, the company has grown significantly through the award of long-term contract frameworks with major utility organisations and infrastructure providers. With a current workforce of over 2,000, our services are delivered through an absolute focus on health and safety as well as market leading levels of service to both our clients and their customers.

Our Headquarters are based in Salford, near Manchester, and we operate from over 21 regional depot bases. We deliver services 24/7/365 in city centres as well as rural locations.

Our vision is to be the best service provider in the UK utilities and infrastructure sectors by safely constructing, maintaining and managing essential services at the lowest sustainable cost.

Our role

As a Software Tester, you will work as part of a team to produce comprehensive Test Plans / Test Cases / Regression Packs. You will be familiar working an Agile way and confident working alongside both technical and non-technical stakeholders.

Key responsibilities

You will test all Development prior to release into production including project work, feature requests and bug fixes

You will prioritise tasks & workload based on releases and deadlines without instruction

You will utilise JIRA & Microsoft Teams to record work

You will identify system bugs and raise accordingly on JIRA, providing the relevant information required for the developers to be able to fix

You will document any testing undertaken, passed or failed, and record findings on Jira

You will identify features/enhancements that would improve systems and be beneficial to the user's experience

You will work closely with the developers, making sure any failed tasks are dealt with accordingly and in a timely manner if required

You will generate test scripts for each set of testing, tailoring to suit the testing criteria

You will document any new functionality implemented into the new system, sending to all users informing of the changes

You will understand the Specification documents for each project

You will proactively look for ways to improve processes and testing

You will create automated tests scripts to benefit regression testing, and implement into the regression testing

You will ensure that all released software is functionally complete and tested in a timely manner

You will maintain and enhance the existing web automation framework

You will execute automation scripts for regression tests and smoke tests against multiple environments

You will carry out exploratory testing

Experience and knowledge

Prior experience as Software Tester / QA Engineer

Automation testing experience - ideally using Selenium Web Driver with C# or Java

Experience of Agile methodologies

Testing Principles and Practices

TDD

Ability to collaborate with developers, business analysts and other test professionals

Salary and Benefits

We offer a competitive salary based on experience along with a full benefits package.

Network Plus is proud to be an Equal Opportunity Employer. We celebrate diversity and do not discriminate based on race, religion, colour, nationality, sex, sexual orientation, age, veteran status, disability status, or any other applicable characteristics protected by law.

We are Armed Forces-friendly. We welcome applications from ex-Armed Forces personnel, reservists, armed forces veterans, cadet instructors and military spouses/partners.

We understand that privacy and the security of your personal information is extremely important. By applying for this role, you agree to the terms of our privacy policy which you can find here - <https://networkplus.co.uk/privacy-and-cookie-policy>.
